

Ph.D. in: Economics Sciences

Specialties:

Monetary and banking economy

Economics and Businesses management

Insurance economy

Quantitative economy

Summary and objectives

This specialized Ph.D. in economic sciences aims to train students in the field of financial sciences, insurance economics and business management. Everything related to financial variables at the macro and partial levels; Where the business is considered the basic cell of every economy. The financial system is the mainstay of sustainable development here. Through the student obtaining a doctorate degree in economic sciences in various available disciplines. This enables him to control many modern concepts of the financial economy and the management of institutions.

The fact that the latter is a complex process that requires a lot of management tools. It opens the way for him to participate in business projects in various forms, especially for small projects, as they do not require huge capabilities. In addition to the student benefiting from an academic training that supports him in the course of his scientific research, and benefiting the owners of large, young institutions in various management methods.
